

DISCHARGE INFORMATION

DR RANA

L.L.E.T.Z.

- You may experience some discomfort. Simple analgesia eg. Panadol or Nurofen may be taken for pain relief.
- You may experience some discomfort when passing urine for the first day or two. If you are unable to pass urine & have associated discomfort please contact Dr Rana
- Vaginal discharge may be clear or blood stained and may continue for 2 – 3 weeks.
- To avoid the risk of infection/bleeding and promote healing:
 - do not insert tampons for 6 weeks following surgery
 - avoid sexual intercourse, baths, and swimming for 6 weeks following surgery
 - practice regular hand hygiene
- If you think you may have a wound infection within 30 days of your surgery, symptoms include but are not limited to feeling hot to touch, temperatures, wound ooze, smelly discharge or if bleeding heavier than a normal period, please contact your surgeon's rooms.

If you have any other concerns following surgery, please contact:

DR RANA – Telephone: (07) 49656565
Mater Hospital After Hours Service (Until 10pm): (07) 49655444

Thank you for using MSDH as your choice of Private Hospital in Mackay.
We would love to hear any feedback you may have by completing our patient satisfaction survey.
An email will be sent to you with a link to complete this survey on our website.
Or you can access it by typing <https://www.msdh.com.au/contact/feedback> into the address bar.
